Tourism Management System
- This website embodies the essence of the Odisha Tourism System, featuring full responsiveness. Itcomprehensively showcases all the tourist destinations across Odisha.
- Technologies utilized in its development include React, Bootstrap, JavaScript, and React-Bootstrap.
- URL:- https://nigammishra.github.io/tourism-management-system/

Grocery Shop
- This self-initiated project is a fully responsive website, similar to any online grocery store. The primary language used is React.js, with additional technologies including HTML, CSS, Bootstrap, React-Bootstrap, and JavaScript.
- URL:-https://nigammishra.github.io/Grocery-react/

Multi purpose Templete
- It is a fully responsive front-end design for a shopping website featuring a wide variety of items, similar to Flipkart and Amazon.
- Technologies utilized in its development include HTML, CSS, Bootstrap, JavaScript and jQuery.
- URL:- https://nigammishra.github.io/EasyShop/

Hotel Template React
- This self-initiated project is a fully responsive website. The primary language used is React.js, with additional technologies including HTML, CSS, Bootstrap, React-Bootstrap, and JavaScript.
- URL:-https://nigammishra.github.io/hotel-project-react/

Gym Template and Bicycle Template
- This self-initiated project is a fully responsive website. The primary languages used is HTML, CSS, Bootstrap, jQuery and JavaScript.
- Gym URL:-https://nigammishra.github.io/Gym-Templete/
- Bicycle URL:-https://nigammishra.github.io/bicycle-website/

Employee Management System
- This React project uses a JSON server as the backend and database, enabling CRUD operations via the server's base URL. The frontend is built with React.js and Bootstrap, supporting API integration for GET and POST methods to retrieve and submit data.
- URL:-https://github.com/nigammishra/employee-management-systemm.git

Library Management System
- It's a full-stack project where admins manage CRUD operations. Data is storedlocally, with login and registration data sourced from session storage.Technologies utilized in its development include React, Bootstrap, JavaScript, andReact-Bootstrap.
- URL:-https://frex-arup.github.io/library-mgmt-react/

Contact Book React
- In this React.js project, all contacts are saved in a JSON server, and CRUD operations—including create, read, update, and delete—are performed on the data.
- URL:-https://github.com/frex-arup/contact-book-react
